Chart labels localised

Q1–Q4 become T1–T4, the Bulgarian abbreviation for тримесечие.

Overflow checked

Bulgarian bullets run about 25% longer. Each box was checked so nothing is cut off.

Brand names kept

Company and product names stay in English unless you ask otherwise.

Text inside images, recreated

In the original deck this diagram was a flat picture, so the words could not be edited. The text was removed and redrawn in Bulgarian in the same style.

Same fonts and colours

The new labels match the original image, so the slide still looks like one piece.

Meaning over word order

Short labels are rephrased to read naturally in Bulgarian, not word for word.

Screenshots left alone

Real software or email screenshots stay as they are, unless you ask.

Tables, prices and speaker notes

Numbers, currencies and punctuation follow Bulgarian conventions. Speaker notes are translated too, so the presenter can read them aloud.
